

The Muskellunge Lake Resort App

Your Northwoods home on Muskellunge Lake · In the family since 1959

PRESENTER'S GUIDE · your eyes only

Your first 60 seconds

Start here before you touch the app. Set the room, then open it.

“We built something for the whole family — one app that's our home base for the lake all year, and especially for Family Fest. Most of you have never seen it. I'm going to walk through it for a few minutes — just watch — and I'll show you how to get it on your phone at the end.”

Goal of this talk: get everyone excited, show how easy it is, and have them add it + sign in before they leave today.

One home base for the whole family

The problem: plans live in texts, group chats, emails, and a dozen Google forms. Things get lost. New people don't know where to look.

The fix: one place — schedule, who's coming, photos, who to pay, how to reach anyone, and everything Family Fest, all in your pocket.

Two jobs: (1) the resort, year-round — fishing, cabins, local spots. (2) Family Fest — the one week the whole clan shows up.

It's a web app — no app store, works on any phone, tablet, or computer, and you can add it to your home screen like a real app.

“Just watch — you don't need an account yet”

Tell them up front so they don't interrupt with sign-up questions:

“You can open and browse the whole app without signing in. So just watch me go through it — don't worry about getting it yourself yet. At the very end I'll show you exactly how to add it and sign in, and we can do it together.”

Why this matters: it parks the #1 interrupting question (“how do I get it?”) until the end, so you can get through the tour cleanly.
